Supervisor Meeting **1**

Sameer Al Harbi

17 October 2022

1 Key Compiled Points

1. Consider a waterfall vs agile based plan for the project

2. Identify what kind of project to make and what tools to use

   - Web Based App with JS and WebGL or ThreeJS
   - Desktop Application with C++ (or other) and OpenGL (or even Vulkan). **This would be harder to user test since installation would be needed**
   - A Library combined with a Demo Application to show it off

3. Consider taking notes for meetings and for all research in general (This is part of that btw)

4. Plan to create a prototype and interim report by the end of semester 1

2 Raw Notes

No Raw Notes were taken this session
